

MANHATTAN COLLEGE
ANNUAL CAREER
OUTCOMES REPORT
CLASS OF 2020

RAYMOND W. KELLY '63
STUDENT COMMONS

A NOTE FROM THE DIRECTORS

We present the annual career outcomes report for the graduating class of 2020. Our data continue to show the strength of our mission to provide a contemporary, person-centered educational experience that prepares graduates for lives of personal development, professional success, civic engagement and service to their fellow human beings, even amidst a global pandemic that has affected our families, our communities and our lives. We are once again impressed with the first-destination career outcomes of our graduates; this year 86% are employed or in graduate school, with just 13% still seeking within a year from graduation.

Each year, the Office of Career Pathways aims not only to uphold the level of service we provide to our students, but to increase the impact we have across campus. After all, development of vocation is one of the central aspects of the college experience. This year we worked with students in-person and virtually maintaining deep connections with students no matter where they were studying, on-campus, at home in quarantine or isolation, or across the globe.

The Office of Career Pathways has also managed to host our key summer programs during this challenging job market. The W.I.S.E. (Women Influencing Successful Enterprise) program and Research Scholars were virtual, and we look forward to this summer when we can once again return to important in-person programming. We continue to engage some of our most exceptional students, companies, faculty and research questions.

We are continually grateful for the hard work of the Career Pathways team and our meaningful collaborations with faculty, alumni and employers. Our students impress us with their determination, passion and embodiment of the Lasallian mission in their next steps and beyond.

SUMMARY RESULTS: 2020 GRADUATES

The 2020 undergraduate class participated in a survey as part of their exit checklist. A follow-up survey was performed in February-March 2021 for all students, and follow-up phone calls and emails were sent to those that selected they were Still Seeking or Not Pursuing Employment/Graduate School in the original survey. These data presented here were compiled based on the responses to both the initial and the follow-up surveys and include the February, May and September 2020 graduates and the December 2019 and December 2020 graduates.

Please note that the inclusion of these data effect response rate. There was a 71% (631/887) response rate overall, with 84% (515/(605 May graduates + 11 MBA)) for the May completers, 63% (44/70) for the September completers, 44% (4/9) for the February completers, 64% (61/95) for the December 2019 completers, and 5% (5/106) for the December 2020 completers. MBA students were included in the May graduation group, unless their degree was conferred on one of the other graduation dates.

86% reported that they are employed or in graduate school; 84% of those that reported having accepted employment indicated they are employed full-time (including those enrolled in graduate school and working). 84% of those that answered the survey questions reported that their employment is related to their field of study and 82% indicated it is in their desired industry. A total of 15% of graduates were still seeking or not pursuing employment or graduate school, similar to the graduates of 2019.

The results from the survey indicate that 9% of students both employed and in graduate school, similar to 2019 graduates. The category Not Pursuing reflects graduates taking time off, graduates that are traveling for a long period, and graduates that have specific family circumstances. The Still Seeking category includes those that have applied to jobs but have not received any offers and those that have applied to graduate school and have not yet received acceptances.

The median base salary of the Manhattan College 2020 graduates that Accepted Employment was \$50,000 -\$60,000 for students working full-time and the average salary from individual reported salaries was \$60,064 (n=110; please note these data include fellowship stipends, but not hourly wages).

Employment and Graduate School Status for February, May, September, December 2019 and December 2020 Graduates.

Accepted Employment includes Full-time Employment, Part-time Employment, Military Service, Fellowships, Internships, and Service Work. Still Seeking includes those that reported Still Seeking Employment and Still Seeking Graduate School opportunities. n=631

Base Salaries. This figure represents base salaries for those that selected they had accepted full-time employment. n=226

LONGITUDINAL DATA

First Destination Employment and Graduate School Data for 2012-2020 Graduates. Accepted Employment includes Full-time Employment, Part-time Employment, Military Service, Fellowships, Internships, and Service Work. Still Seeking includes those that reported Still Seeking Employment and Still Seeking Graduate School opportunities.

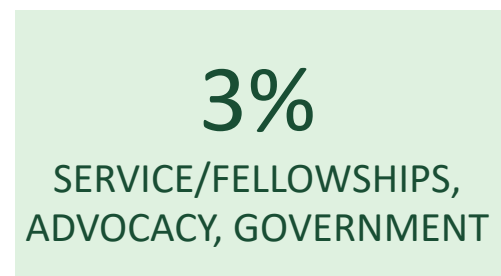

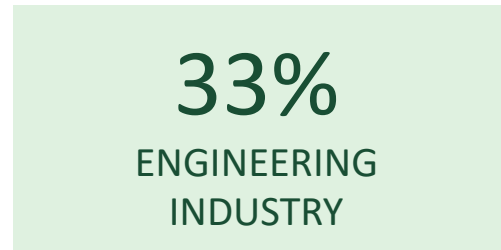

INDUSTRIES OF EMPLOYMENT

Industry employment data were gathered based on the reported job title and employer industry. Engineering topped our list of industries with 33% of our students who accepted employment entering the Engineering industry. Another 14% entered the Business industry, while 9% entered the Finance and Accounting industry.

With respect to mission, about 3% of our graduates accepted public service jobs in the government, advocacy roles, or fellowships in service including AmeriCorps, Peace Corps, Lasallian Volunteers, and Jesuit Volunteer Corps. In addition, about 12% of our 2020 graduates that accepted employment are working in Education and an additional 5% are working in Health and Human Services.

Our Top Employers list each hired two or more of our graduates, very often through Office of Career Pathways recruiting forums, including On-Campus Recruiting, Career Fairs, and information sessions. This list of organizations reflects the major industries that our graduates entered after graduation.

MASTER'S IN HUMANITIES/SOCIAL SCIENCES	3%
OTHER	1%

Degrees Sought. This table represents what degrees our students pursued after graduation. n=180

30% of the 2020 graduating class enrolled in graduate school. The breakdown of Fields of Study shows the largest groups entering graduate programs in Engineering, Business, and Education. The Doctoral, Master's and Bachelor's Level Health Professions groups pursue fields including Nursing, Medicine, Dentistry, Veterinary, Pharmacy, Occupational Therapy, Podiatry, Physical Therapy, Nursing, Physician Assistant, Public Health and other health fields. 85% of the graduates who enrolled in graduate school are seeking a Master's degree, 6% a medical or health professions doctorate, 6% a doctoral (Ph.D.) program in a discipline, and 3% a law degree.

Our Top Graduate Schools list includes Columbia University and other New York City schools, which reflects our graduates' desires to stay in the tri-state area. 58% of students that enrolled in graduate school stayed at Manhattan College for graduate studies.

ENGAGEMENT WITH OFFICE OF CAREER PATHWAYS

Engagement with OCP in Senior Year. This figure shows how students engaged with OCP in their Senior Year. n= 426

MENTOR PROGRAM

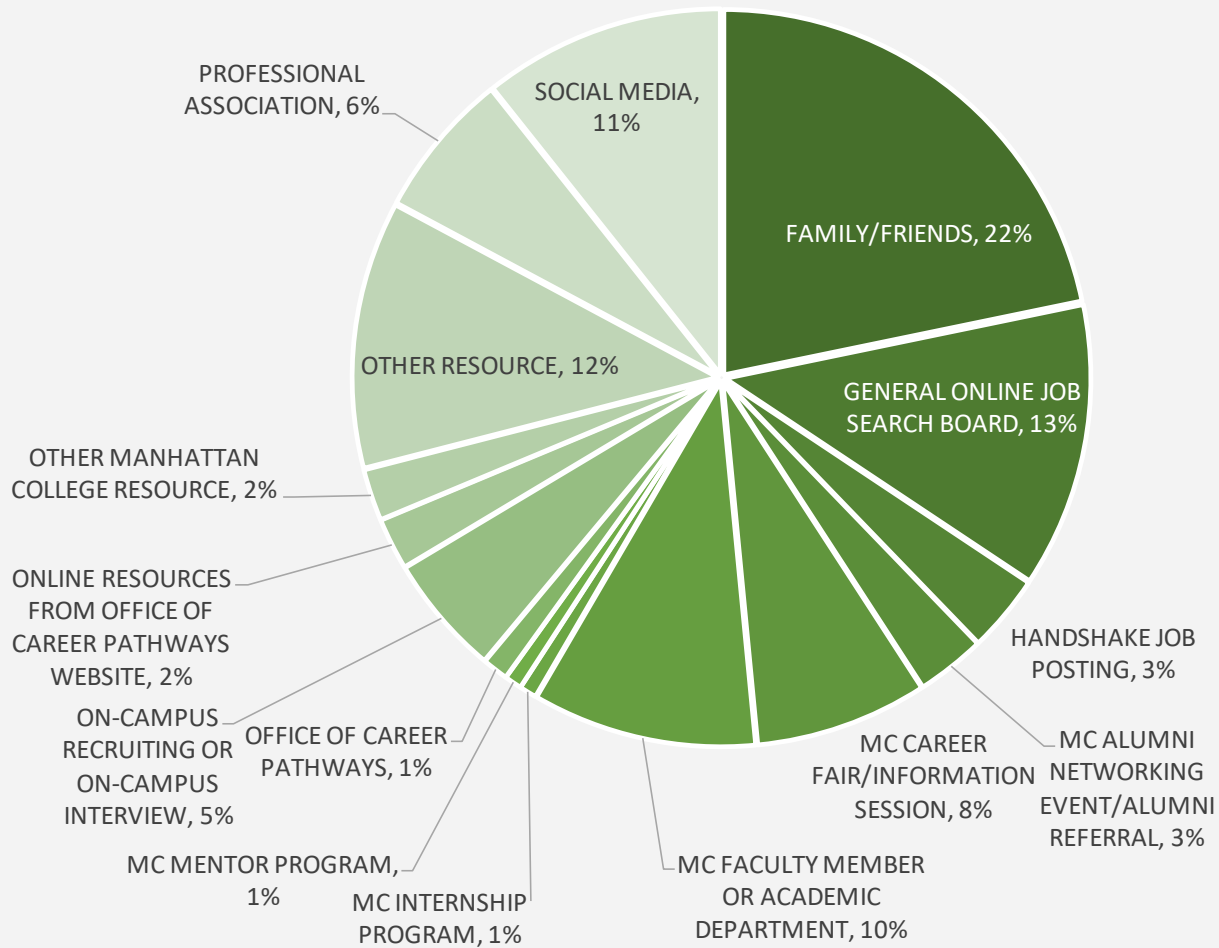

25% of the 2020 graduating class that responded participated in the Mentor Program, up from 21% for the 2019 class. The Mentor Program is one of the core programs managed by the Office of Career Pathways, and it matches students with alumni for a year of mentorship. Freshmen in School of Engineering, and Sophomores and Juniors in the other schools are eligible for the program. Only 8% of the students that participated in the Mentor Program were still seeking employment.

Mentor Program. This figure shows the career outcomes for those students that reported participation in the mentor program during their time at MC. n= 107

92%

Of those that participated in the Mentor Program had a positive career outcome

HOW GRADUATES FOUND EMPLOYMENT

How Graduates Obtained Employment. This figure shows how graduates obtained employment through various MC resources. n=262

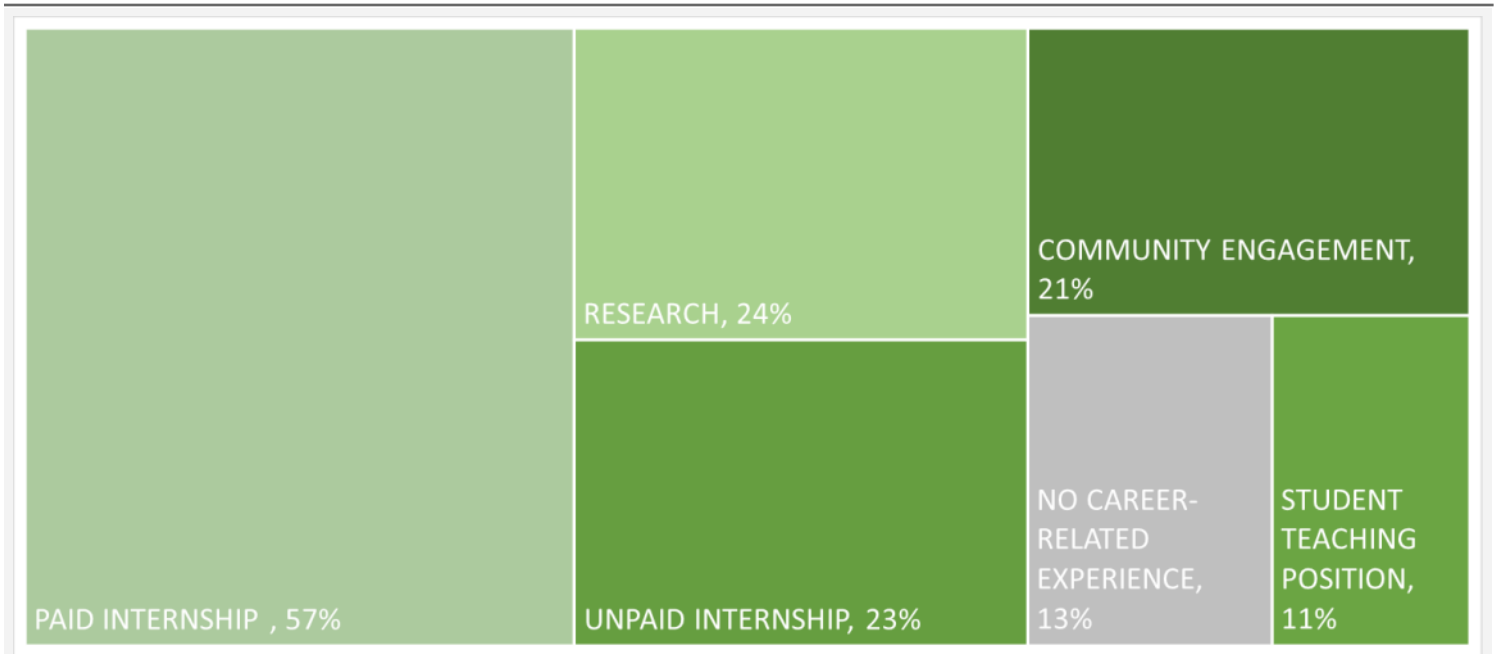

85%

OF THOSE THAT USED OFFICE OF CAREER PATHWAYS WOULD RECOMMEND THEM TO A FRIEND

44%

OF THOSE THAT ACCEPTED EMPLOYMENT INDICATED IT WAS THROUGH A MANHATTAN COLLEGE RESOURCE

CAREER-RELATED EXPERIENCES

Experiences Related to Field of Study. This figure shows the numbers of students participating in various co-curricular experiences during their time at MC. Students were allowed to select more than one response. n= 423

73% of the graduating class of 2020 reported having at least one internship during their time at MC (data not shown). 57% of students reported having a paid internship, a small increase from 54% in 2019 and 23% reported having had an unpaid internship, an increase from 22% for the 2019 graduating class (please note that students were allowed to select more than one response). 13% of the graduating class indicated that they did not have any experiences related to their field of study, similar to previous years.

When asked about research for credit, research not-for-credit and summer research, 23.5% of the graduating class indicated that they had a research project with a faculty member before graduation (data not shown). When asked whether or not they had a student-faculty research project related to their field of study either at MC or another institution, 24% of the graduating class also indicated they had one of these experiences.

Students that had a paid internship or research experience were significantly less likely to still be seeking graduate school or employment (13%) vs. those that had no experiences related to their field of study (28%).

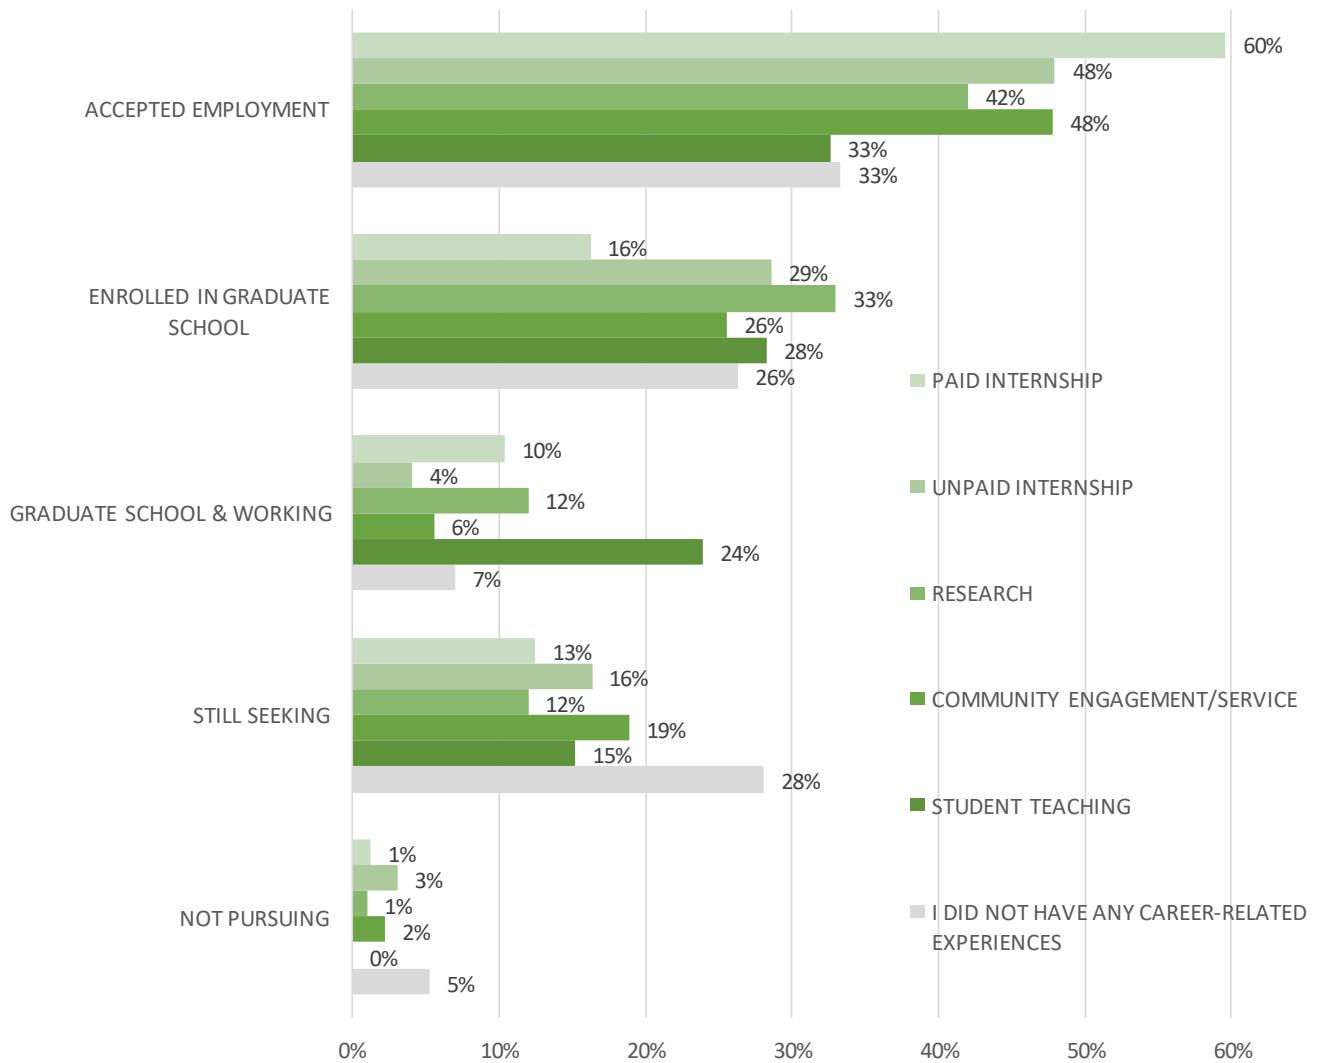

80%

OF STUDENTS REPORTED HAVING AN
INTERNSHIP DURING THEIR TIME AT
MANHATTAN COLLEGE

87%

HAD AT LEAST ONE CAREER-RELATED
EXPERIENCE

EXPERIENCES RELATED TO FIELD OF STUDY: CAREER OUTCOMES

Experiences Related to Field of Study: Impact on Career Outcomes. This figure shows the career outcomes for students that have had at least one of each of the types of experiences. n= 423

24%

OF STUDENTS REPORTED HAVING A RESEARCH EXPERIENCE BEFORE GRADUATION

ONLY 13%

OF STUDENTS THAT HAD A PAID INTERNSHIP WERE STILL SEEKING

ATHLETICS

Students that reported being a Division I athlete had very high positive career outcomes, with 40% accepting employment, 40% enrolled in graduate school, 9% employed and in graduate school and only 11% still seeking and none not pursuing. These data are reflective of the number of career initiatives supported by athletics and career pathways.

Career Outcomes for Division I Athletes. This figure shows the career outcomes of students that reported participating in Division I athletics at Manhattan College. n=53

89%
 OF THE 2020 MANHATTAN COLLEGE
 DIVISION I ATHLETES HAD A POSITIVE
 CAREER OUTCOME

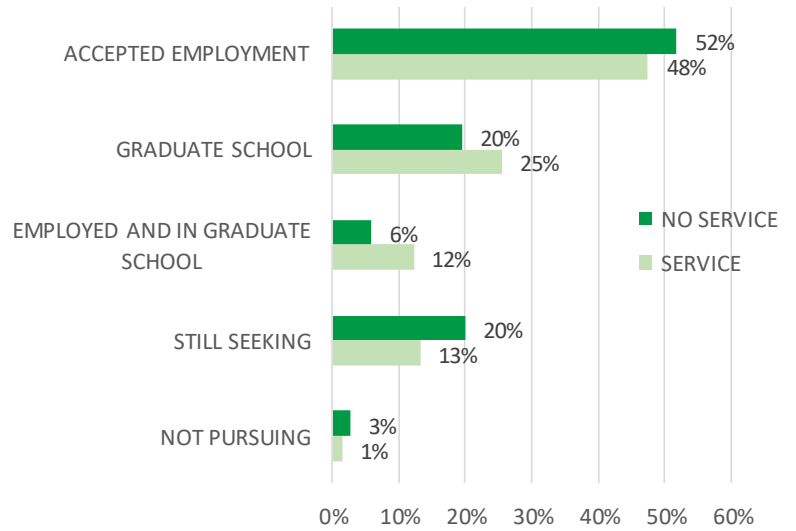

COMMUNITY ENGAGEMENT

48% of the 2020 class reported participation in volunteer, community service, advocacy and/or civic engagement activities during their time at Manhattan College. There was a difference in career outcome between students that participated in service vs. those that did not participate in service. Those that participated in service were less likely to still be seeking (13% vs. 20%) and more likely to be in graduate school.

About 26% of the 2020 graduates that participated in service indicated that it affected their career plans (data not shown).

26%
OF THE GRADUATES THAT PARTICIPATED IN SERVICE INDICATED THAT IT AFFECTED THEIR CAREER

Service and Career Outcomes. This figure shows career outcomes of students with that participated in service. n= 204 Service; n=217 No Service

STUDY ABROAD

19% of the students reported participation in study abroad. Positive career outcomes for the students that studied abroad was not significantly different that those that participated in a study abroad program. Those that participated in a study abroad program were less likely to still be seeking, and more likely to be in the Employed and in Graduate School category.

19%
OF THE 2020 GRADUATING CLASS REPORTED PARTICIPATION IN AT LEAST ONE STUDY ABROAD PROGRAM

Study Abroad and Career Outcomes. This figure shows career outcomes of students that reported participation in study abroad. n= 81 Study Abroad; n=341 No Study Abroad

COMMUNITY ENGAGEMENT AND INTERNATIONAL EXPERIENCES

IN SERVICE AFTER GRADUATION

48%

PARTICIPATED IN VOLUNTEER, COMMUNITY SERVICE,
ADVOCACY AND/OR CIVIC ENGAGEMENT ACTIVITIES
DURING THEIR TIME AT MANHATTAN COLLEGE

FIRST-GENERATION

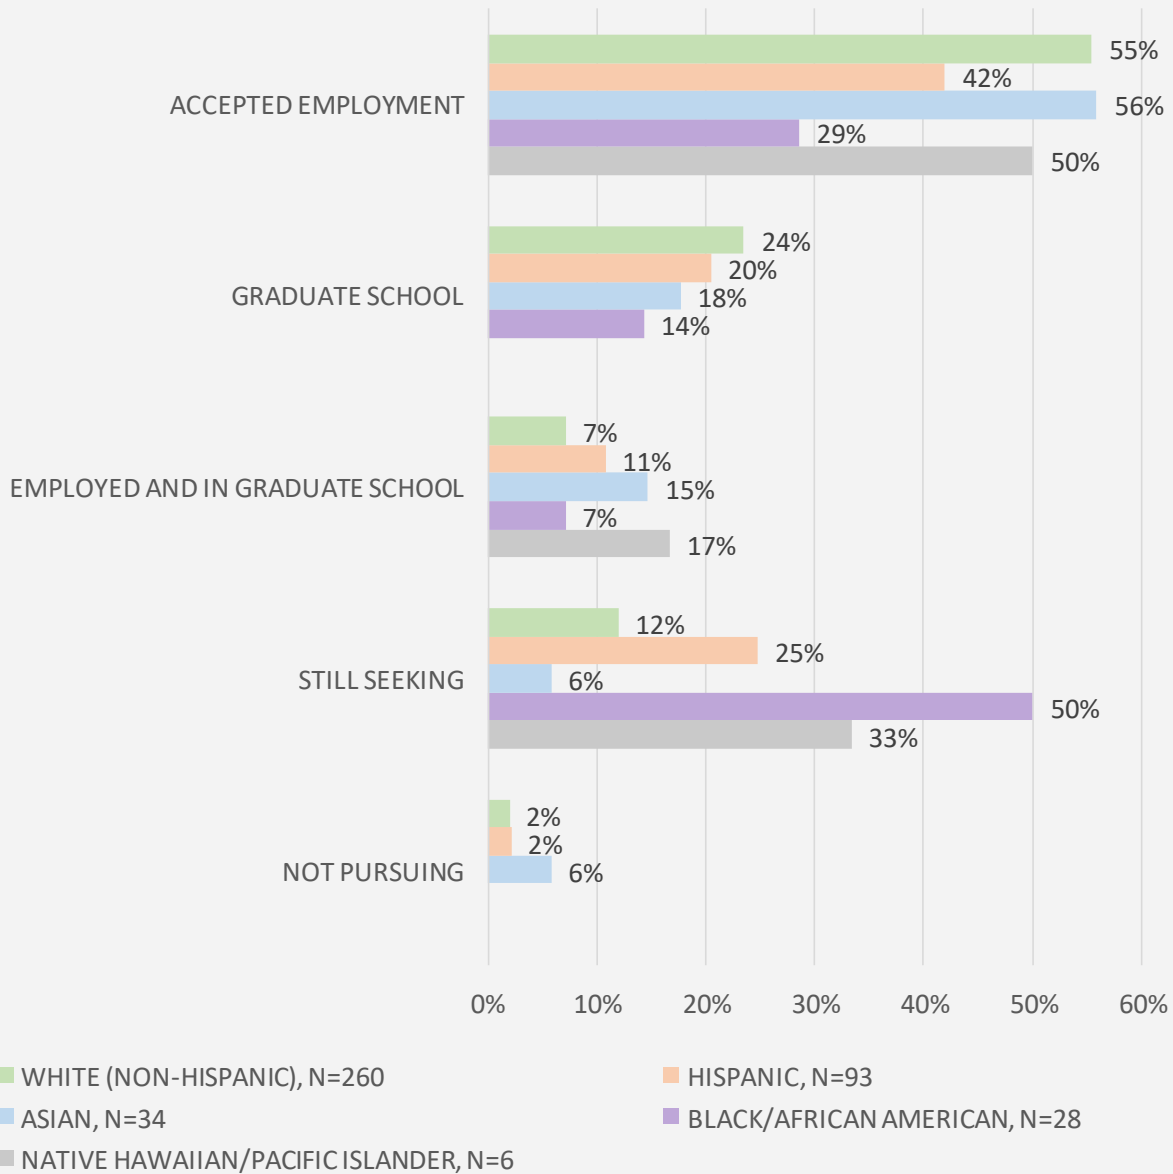

37% of the students self-reported as first-generation in the survey, indicating that neither parent had completed a college degree. Positive career outcomes for our first-generation population were lower than our not first-generation students, similar to previous years.

First-Generation Students and Career Outcomes. This figure shows career outcomes of students that reported being the first generation to go to college. n= 147 first-generation; n=252 not first-generation

37%
OF THE 2020 GRADUATING CLASS
REPORTED THAT THEY ARE
FIRST-GENERATION COLLEGE STUDENTS

ETHNICITY AND CAREER OUTCOMES

Ethnicity and Career Outcomes. This figure shows career outcomes of by self-reported race or ethnicity. These data were compiled from two separate survey questions, and students were able to select more than one response. n= 401

Students were asked to confirm their race/ethnicity on the graduating student survey. For the graduating class of 2020, there are differences in career outcomes between some groups of minority students and their white peers.

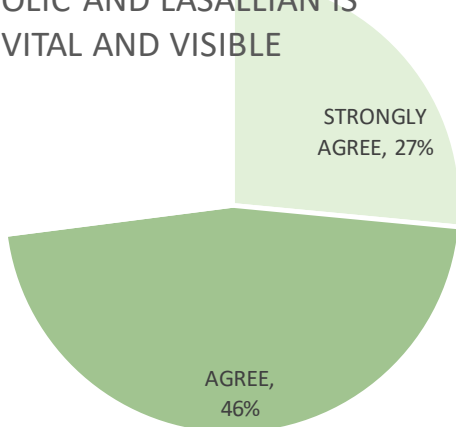

23% of the Class of 2020 respondents identified as Hispanic or Latino. For the 2020 graduating class, 25% of Hispanic students were still seeking vs 12% of their white peers, an increase in gap from 2019, where 18% of Hispanic students were still seeking vs. 11% of their white peers. 7% of respondents identified as Black or African American. Positive career outcomes for Black or African American students were significantly lower than their white peers (88% vs. 50%). Asian respondents were less likely to still be seeking employment vs individuals in all other ethnicity categories.

Fields of Study. This figure shows the breakdown of fields of study for students that reported enrolling in graduate school. n=62

SCHOOL OF SCIENCE

The follow-up survey for School of Science was performed from February-March of 2021, where graduates were asked to update their Employment/Graduate School status via electronic survey. For those that selected Still Seeking or Not Pursuing in the original survey, graduates were contacted for their information by phone. These data presented here were compiled based on the responses to both surveys. For School of Science there was a 73% response rate (52 responses/71 graduates). About 79% of the School of Science graduates reported that they are employed or in graduate school.

Employment and Graduate School Status. Accepted Employment includes Full-time Employment, Part-time Employment, Military Service, Fellowships, Internships, and Service Work. Still Seeking includes those that reported Still Seeking Employment and Still Seeking Graduate School opportunities. n=52

Base Salaries. This figure shows the breakdown of salary data for students that reported accepting full-time employment. n=15

Mean Reported Salary: \$71,500; n=4
