¹ On March 13, 2017, The New York State [Board of Regents](#) voted to eliminate the Academic Literacy Skills Test (ALST) that was one of four exams required for public-school teacher certification. A task force of educators commissioned by the Board examined the path to becoming a teacher and determined that the ALST was poorly designed, redundant and expensive. The task force also raised concerns about the differential in exam scores by race and ethnicity, and said the test hadn't been properly assessed for potential bias.
