Title of Research Proposal _____

Anticipated Duration: Start _____ End _____
Year Month Day Year Month Day

Do you need campus housing? _____

Research Proposal

*Please attach a description of your proposed research project.
Files must be either in a **pdf** or a **Word** format.*

Signature of Student _____

Please read carefully:

I understand that my electronic signature above:

1. certifies that the information which I am providing on this application is, to the best of my knowledge, accurate and complete;
2. indicates that I voluntarily give the School of Science permission to verify the information I have provided;
3. affirms that I will complete the proposed research project at Manhattan College if chosen to receive an award.

Signature of Department Chair _____

Proposal Guidelines

Please include the following sections (if relevant) in your research proposal. In addition, you will need to have your proposal signed by your faculty advisor. Please limit your proposal to 3 pages.

Contact Information	Please include your Name, email address, cell phone number, and Department.
Faculty Advisor Information	Please include your Faculty Advisor's Name, Department, email address, and Signature.
Significance	Please explain the impact of your research project both in the context of your academic discipline and to society more generally. Describe how your proposal fits into the research or literature of your field.
Goals and Objectives	Please give a clear statement of your goals and objectives for this work. This statement may be your thesis statement, research question, hypothesis, or other explanation of your goals and objectives. If the proposed work is part of a larger project (either yours or your research advisor's), state the specific goals and objectives that will be accomplished during the summer session funded by this program.
Project Design	Please provide a short description of how you plan to execute your project, your research methods, and your timeline. How will you address the questions involved in your thesis, research question, or hypothesis? This may include research techniques, theoretical perspectives, data collection and analysis methods, etc. Please explain how these methods will support or address you goals and objectives.
Feasibility and Off-Campus Work	Please identify any archives, equipment, materials, contacts, or other resources which you require to complete your project. If these resources are not available at Manhattan College, explain how you or your faculty mentor will secure access to them. Also, if you will complete any research away from campus, please identify the dates when you expect to be away, where you will be, and why it is necessary.
Presentation	Please identify at least one professional conference or publication to which your work might be submitted. In addition, it is expected that all Summer Research Scholars will make a presentation to the School of Science community at the end of the summer research period.
Personal Interest and Career Goals	Please explain your interest in this research proposal/topic. Also please explain some of your future career goals and how these goals are related to this research project. Please identify the knowledge and skills you expect to acquire by completing this project.
